

 **UBM MARINE**
YACHT & SHIP

About Us

FROM DESIGN TO DELIVERY

UBM Marine, established in 2005, operates from Tuzla and Yalova shipyard zones in Turkey. We specialize in the design, newbuilding, repair, and conversion of commercial vessels and yachts. With in-house Naval Architects, Marine Engineers, and highly skilled technicians, we deliver tailor-made solutions that combine quality, efficiency, and safety.

Vision

To be a leading provider of newbuilding, repair, and engineering services for the global marine industry.

Mission

To deliver high-quality vessels and yachts with innovative design, reliable engineering, and strong focus on safety and environmental responsibility.

Our Services

Newbuilding

General cargo, tankers, containers, barges, tugs, and fast craft

Repair & Conversions

Refits for all vessel types, with reliable drydock slots and international standards

Yachts

Custom yacht newbuilding and refits with premium finishing

Engineering & Design

Naval architecture, production planning, piping, electrical, HVAC, and more

Project Management

End-to-end execution from design to sea trials

S&P Advisory

Finding, negotiating, and delivering vessels worldwide

***Complete lifecycle
support:***
build, repair/refit,
resale

Key Strengths

Strong partnerships with leading Turkish shipyards

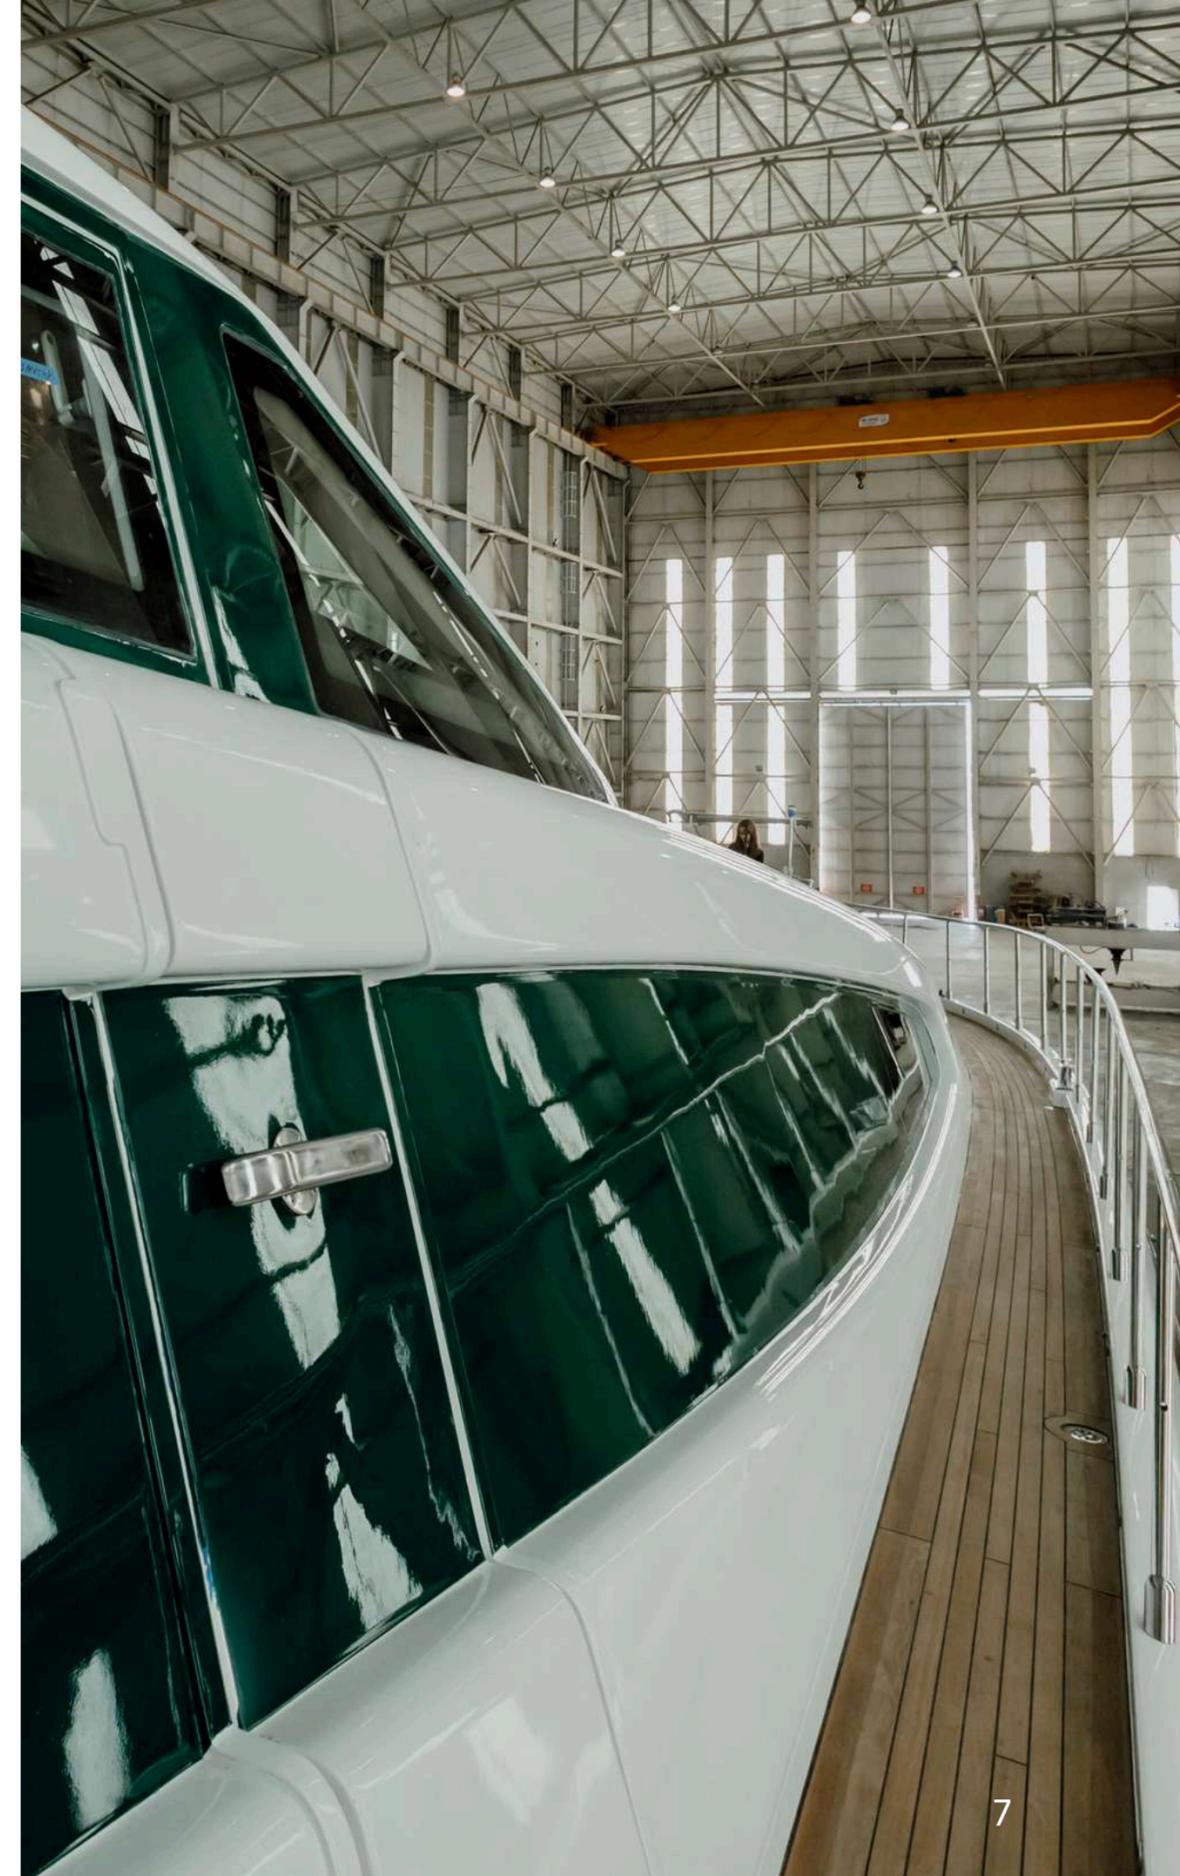

Cost-competitive, high-quality workmanship

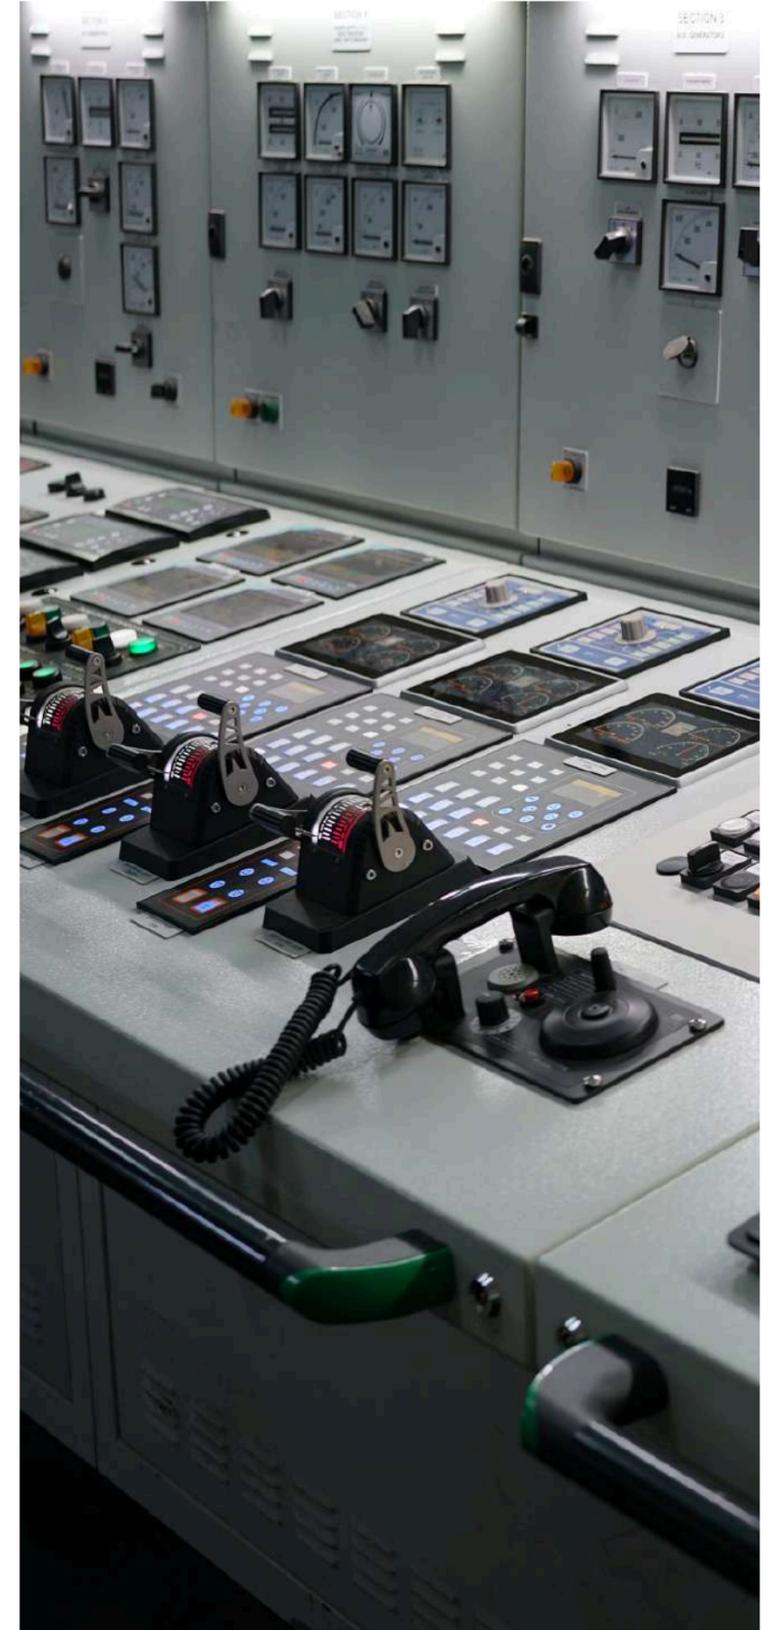

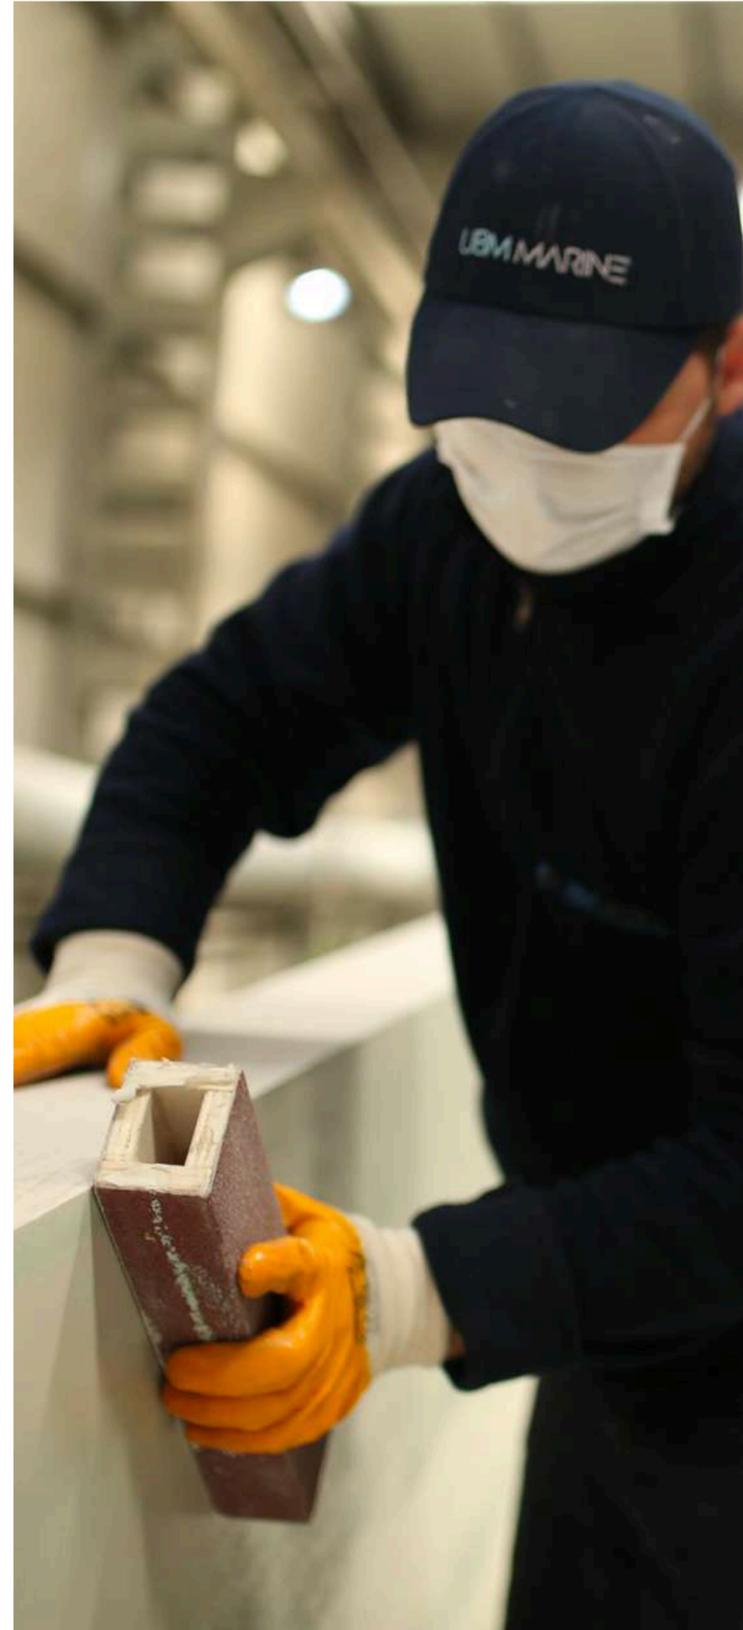

Experienced project managers and engineering teams

Proven track record in international contracts
Internationally recognized standards (IACS-certified technicians)

Cost-effective Turkish shipyard advantage

Custom, innovative designs adapted to client needs

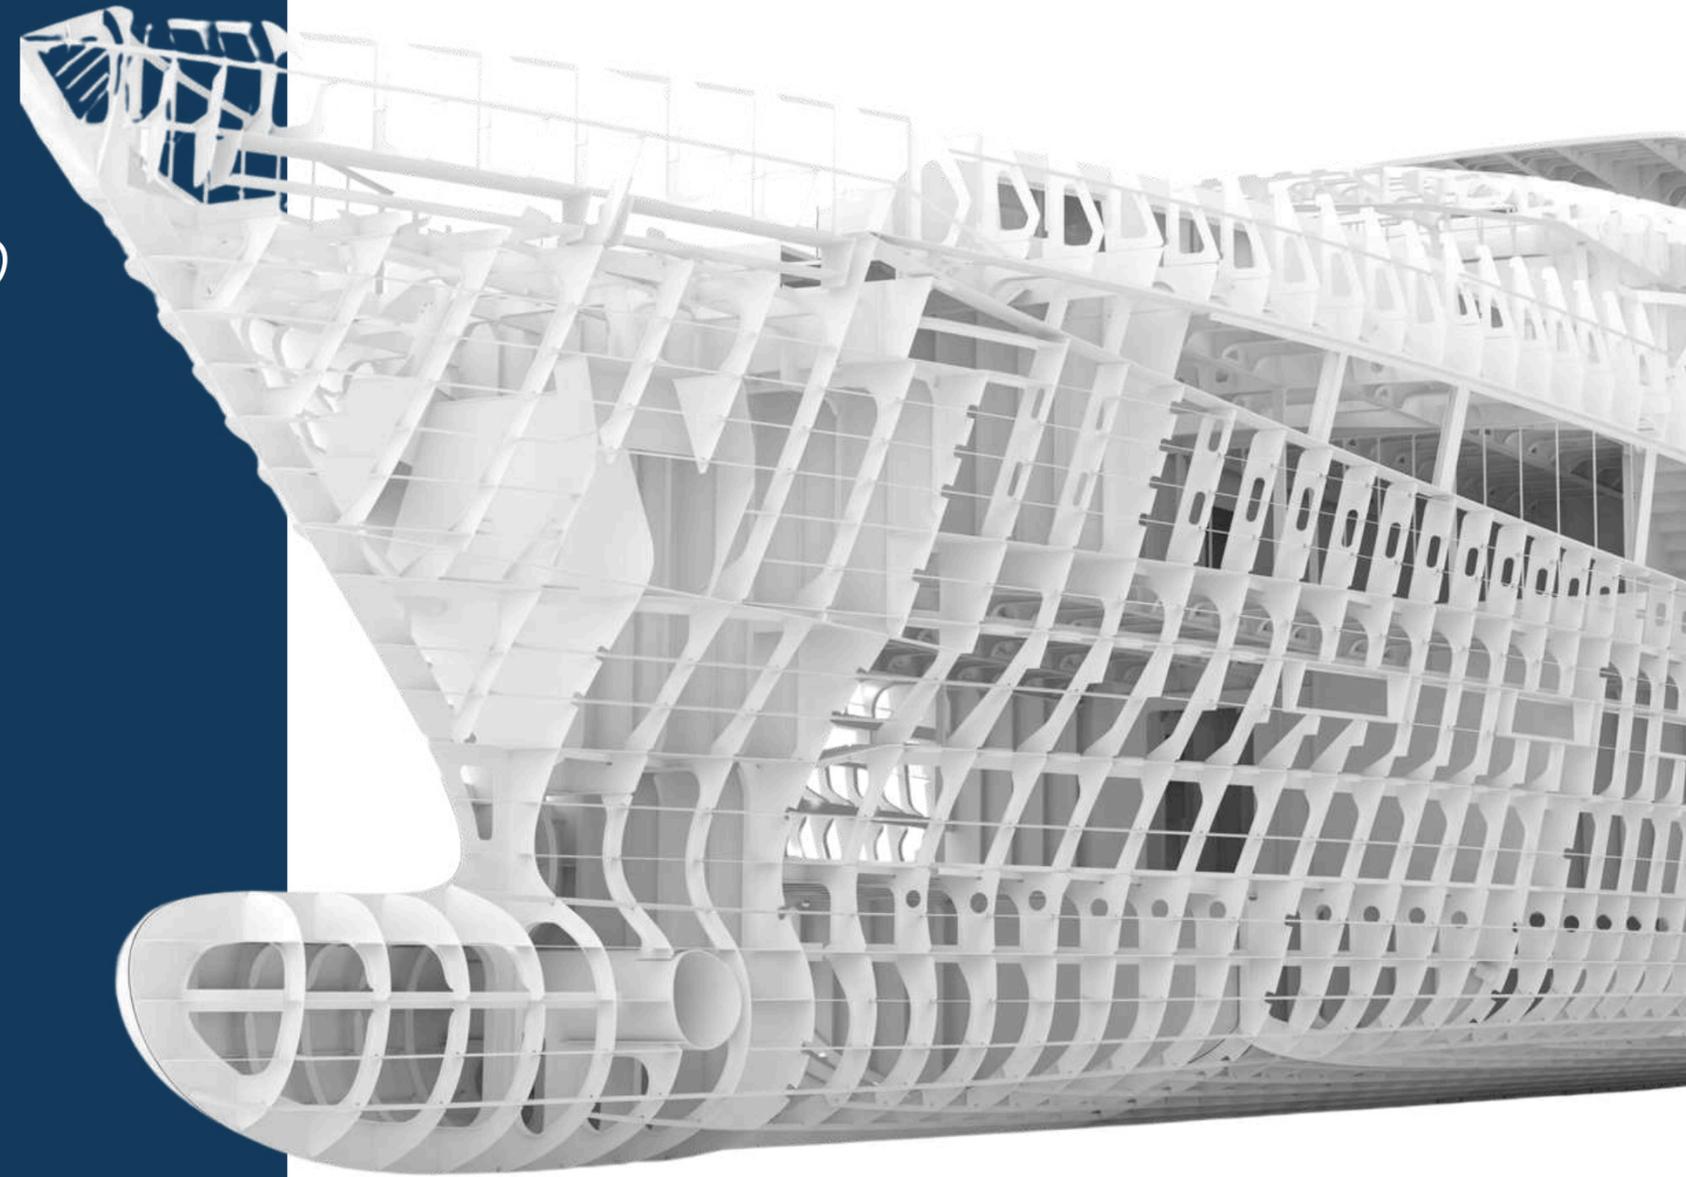

Engineering & Design

Our design team provides high-performance, tailor-made designs for newbuild vessels and yachts, as well as conversions, covering the following disciplines:

- Advanced Engineering
- Production Engineering
- Electrical Engineering
- Noise & Vibration Engineering
- Outfitting Engineering
- Concept & Main design
- Electronic System Design
- HVAC System Design
- Piping System Design

Our design team delivers complete class and workshop drawings, supported by advanced 3D modeling and piping isometrics, ensuring precision and efficiency throughout the vessel construction process.

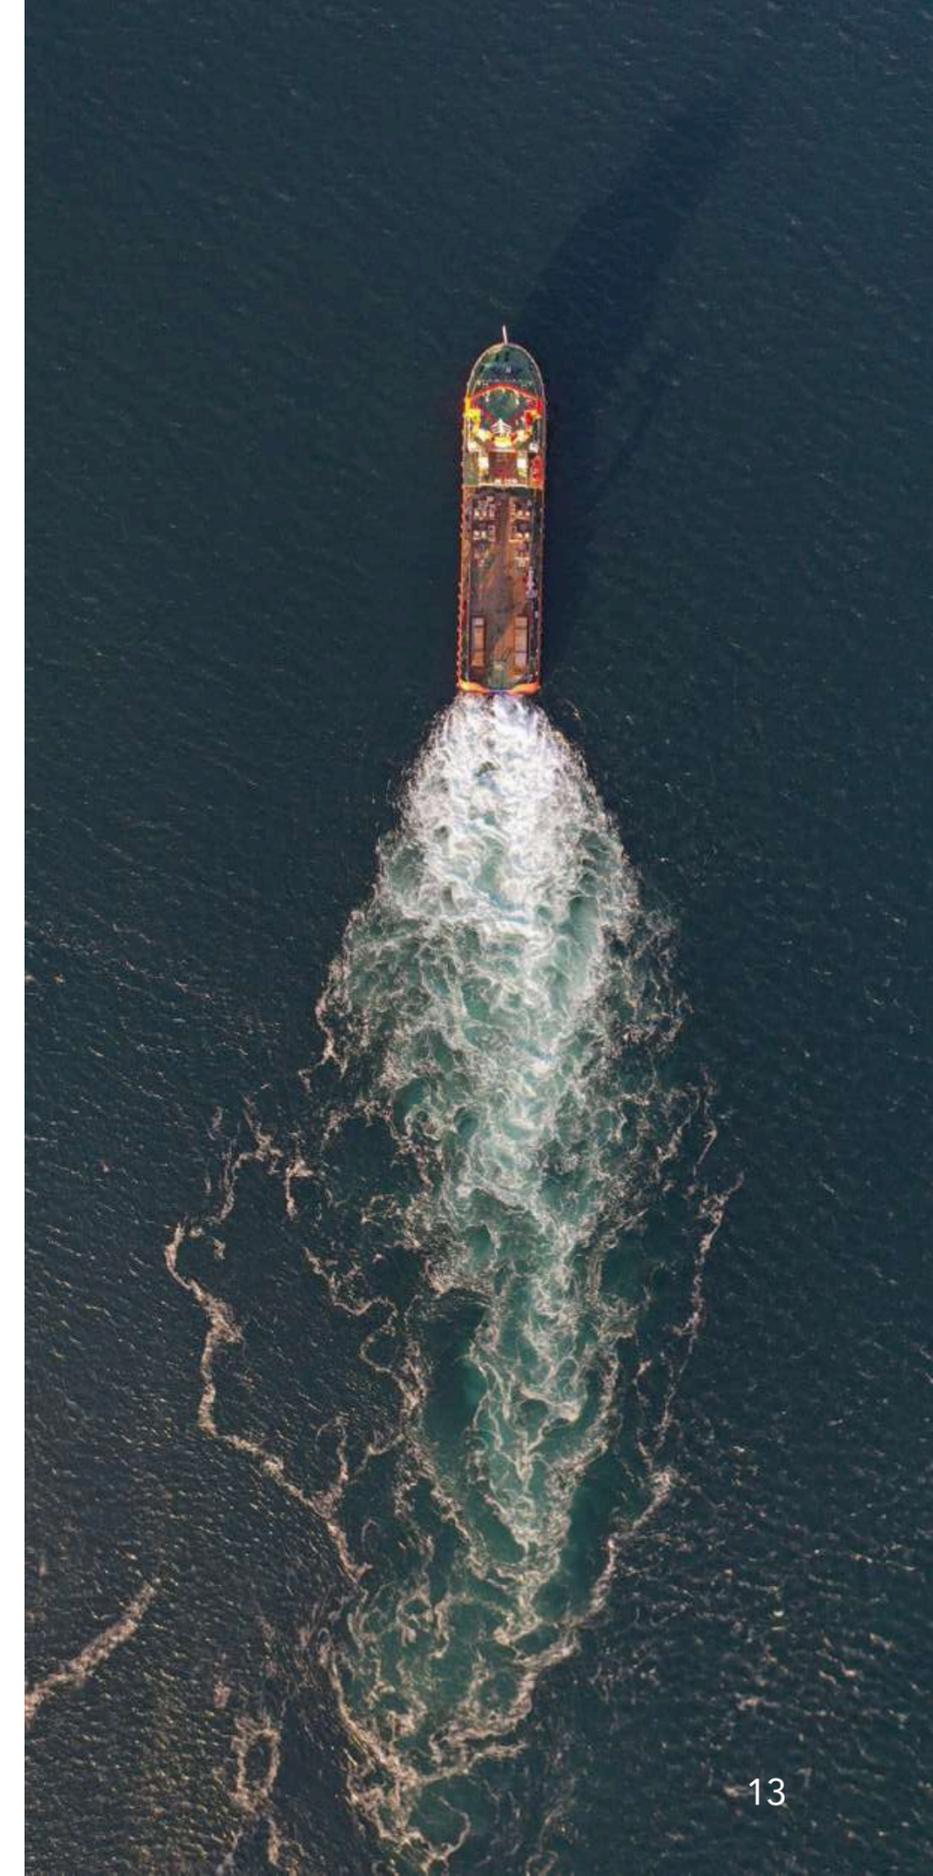

Newbuilding

UBM develops solutions that optimize environmental, economic, and technical performance across all projects.

During the newbuilding process all further needs can be arranged by our professional team in order to provide highest quality and on time delivery.

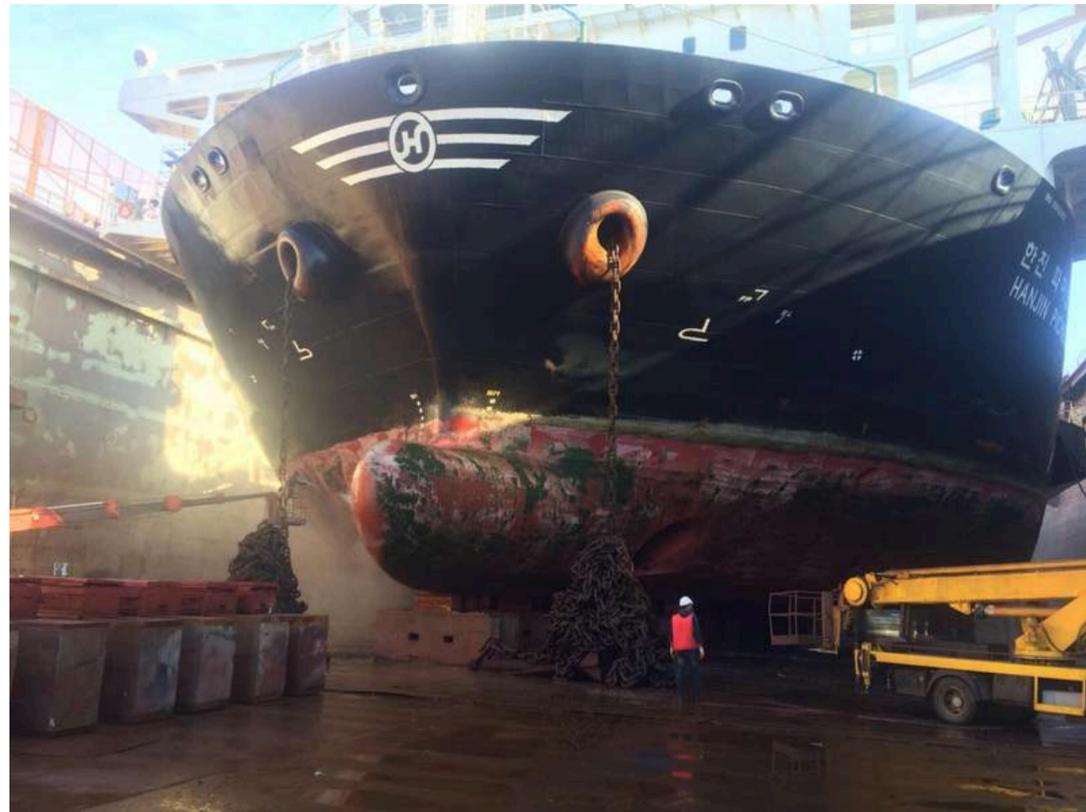

- General Cargo Vessels
- Tug Boats
- Yachts
- All Kind of Barges
- Tankers
- High-Speed Crafts (Patrol, Pilot Boats)

Repair & Conversion

We have extensive experience in vessel conversions to increase efficiency across different maritime sectors

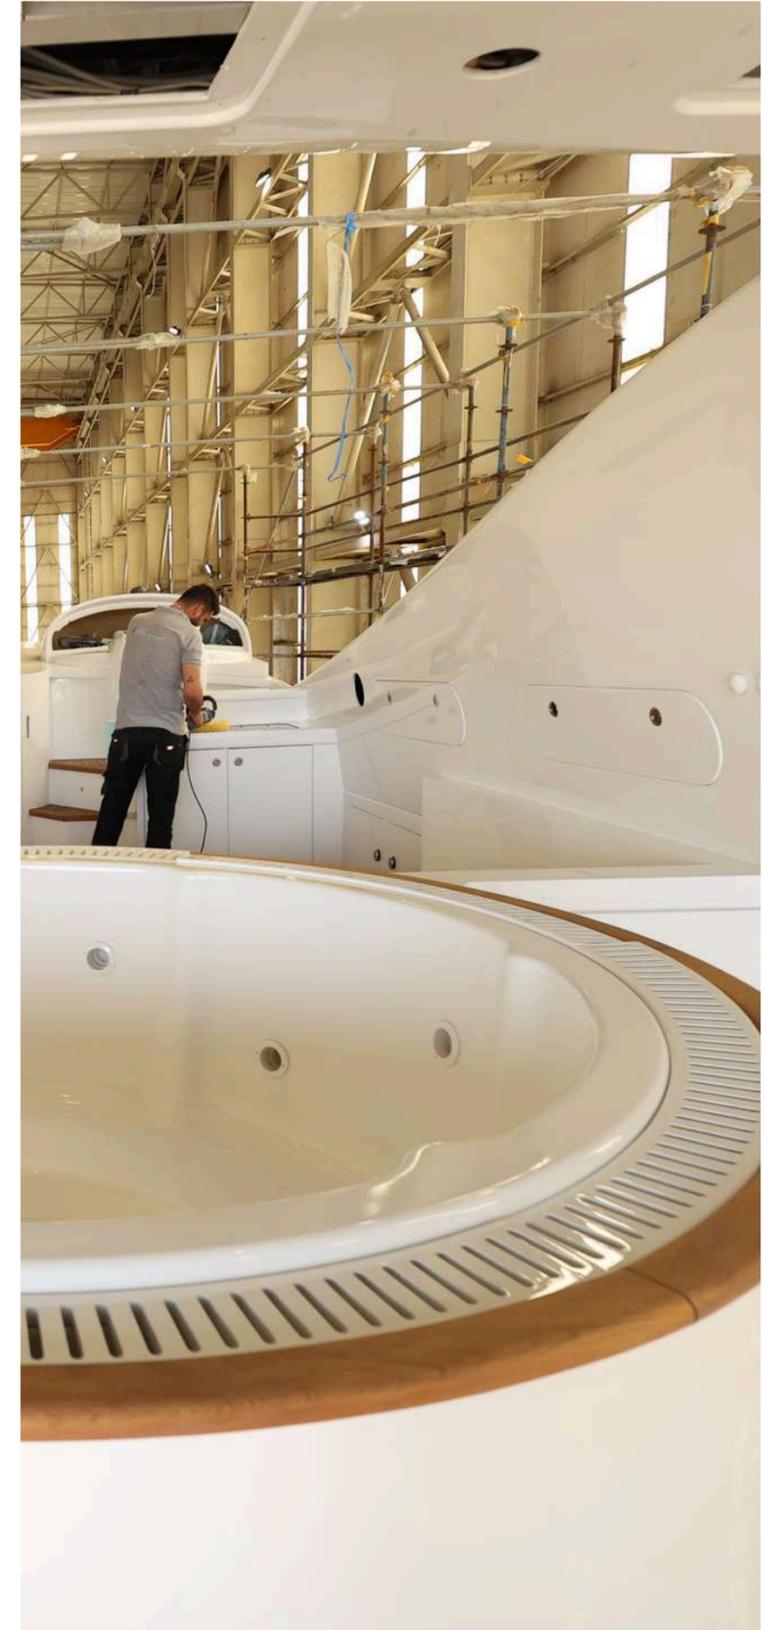

UBM has undertaken repair projects both in Turkey and abroad

We work closely with leading shipyards in Turkey to provide our clients with the best combination of price and quality

We have exclusive co-operation with our partner shipyards to be ensured satisfactory and on time dry-dockings and repairs for all vessels

UBM is taking efforts to achieve rapid development and introducing more advantages to our clients

Yacht Division

PREMIUM FINISHING

Since 2018, UBM Marine has been delivering custom yacht newbuilding and refit projects from its dedicated facilities at Aykın Shipyard, Istanbul. Our team is recognized for its strong technical expertise, client-focused approach, and proven project execution.

Steel & Aluminium Construction

Outfitting (St. Steel Outfitting)

Project Management

Design Coordination – Technical supervision, design reviews, and quality assurance

Construction Oversight – Monitoring methods, techniques, and sequences applied by contractors

Risk & Compliance Management – Identifying potential delays, cost overruns, or breaches in project agreements

Quality Assurance – Reviewing materials, systems, specifications, and workmanship

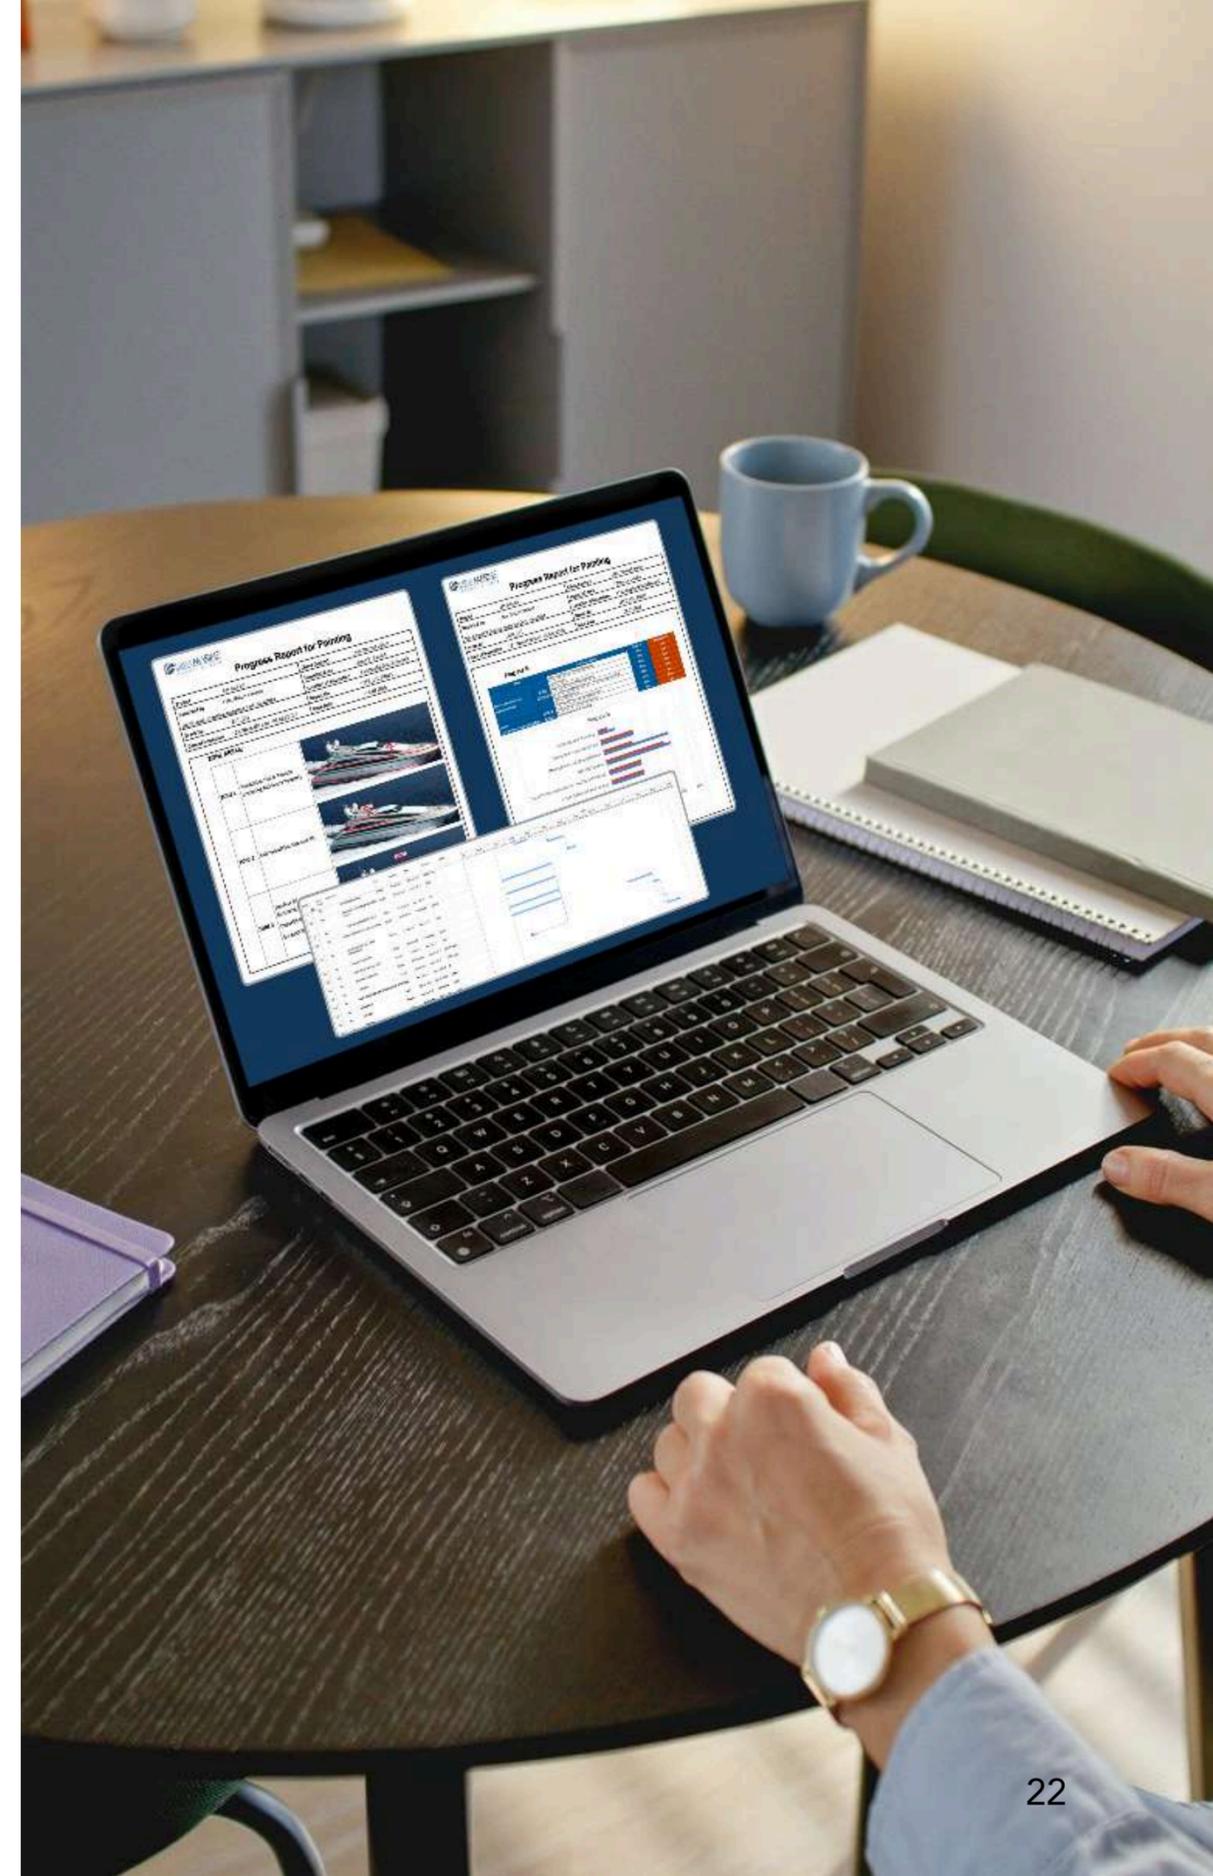

Value Engineering – Optimizing designs and systems for cost-efficiency and performance

Budget Control – Preparing budgets, cost reports, valuations, and payment certificates

Schedule Management – Tracking timelines to ensure on-time delivery

Our team works closely with owners to review all technical documentation, coordinate with the shipyard on the correct scope of supply, and provide weekly inspection reports to ensure uncompromising quality throughout the project.

We provide full process transparency through our customized online traceability tools.

Sales & Purchase

Our team combines deep market knowledge with strong negotiation skills to support clients in the S&P of vessels. We provide end-to-end assistance covering all vessel types, including container ships, bulk carriers, oil and gas tankers, tugs, and barges

Identifying and sourcing vessels that match client requirements

Organizing and coordinating vessel inspections

Leading negotiations and finalizing contractual agreements

Managing documentation and compliance with regulatory requirements

Delivering the vessel to its designated home port

With our expertise and international network, we ensure that every S&P transaction is handled with efficiency, transparency, client-focused solutions

A SATISFIED CUSTOMER IS A PROUD ACHIEVEMENT FOR US.
